Учащийся успешно прошел онлайн-специализацию без права на
зачетные единицы

Climate change education

In this specialization, fundamental topics related to climate change were addressed, including its scientific basis and relevant ethical and social aspects. The implications of climate change in areas such as water, energy, landscape, soil, and health were explored. Individual, school, and community-based approaches to promote a more sustainable and healthy lifestyle were analyzed. Additionally, the course introduced a variety of educational techniques, such as games, debates, experiments, theater, and multimedia, to enhance the classroom learning experience.

Juan Cristóbal Bonnefoy
Chief of the Inter-
American Institute for
Economic and Social
Development
BIDAcademy

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
